

# ProphyCare® HAp

ProphyCare HAp is a fluoride and paraben free, one-step prophy paste that effectively removes stains while helping to reduce hypersensitivity.

**Fluoride and  
Paraben free**

## Smooth & Creamy

The appealing mild mint taste and creamy texture is pleasant for patients of all ages.

## One Step Procedure

ProphyCare HAp is a one-step prophy paste offering effective stain removal in the beginning of the treatment and giving the paste its final gentle polishing properties in the end.

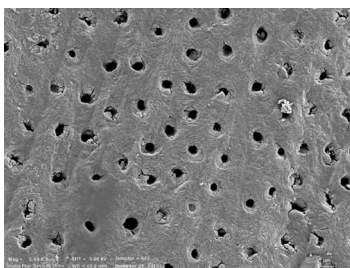

## Remineralizing

Studies\* have shown that products containing hydroxyapatite have better remineralization properties than those of traditional fluoride products.

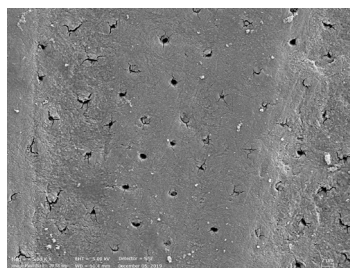

\*Enamel and dentine remineralization by nano-hydroxyapatite toothpastes, JOD, Volume 39, Issue 6, June 2011, Pages 430-437, study by Peter Tshoppe, Daniela L. Zandim, Peter Martus, Andrej M. Kielbassa

## Desensitisation

ProphyCare HAp has a composition containing hydroxyapatite that effectively blocks the open dentin tubules on an exposed dentin surface, helping to reduce hypersensitivity. (5KX magnification. Data on file)
